Project Name	Deep Learning Model for Detecting Diseases in Tea Leaves

Download The Dataset

❖ Collect images of different food items organized into subdirectories based on their respective names as shown in the project structure.

❖ Create folders of types of food items that need to be recognized.

❖ In this project, we have collected images of 5 types of tea leaves, they are saved in the respective subdirectories with their respective names.

❖ For more accurate results we can collect images of high resolution and feed the model with more images.

❖ For more accurate results we can collect images of high resolution and feed the model with more images.

❖ You can download the dataset used in this project using the link below.
